

Calhoun County Lead Safe Program

APPLICATION PROCESS

Referral

A referral will be received from health department, MDHHS, or individual applications.

Schedule PFI

Upon application approval, a Preliminary Field Investigation (PFI) will be scheduled.

LIRA

A Lead Inspection Risk Assessment (LIRA) will be done to identify lead-based paint hazards.

Scope of Work and Bids

Scope of work (meaning what needs to be done to remove the lead hazards) will be written and bids are requested from lead safe certified contractors.

Work Scheduled

Once a bid is awarded, a work start date will be scheduled.

Relocation

If needed for safety reasons, individuals may need to relocate (temporarily move out) while the work is being done. **

Clearance

Once the work is done, a clearance is conducted to make sure the house is lead-safe.

Move Back In

If individuals had to relocate, when the clearance passes, they will be able to move back in.

** Assistance is available for those who can't relocate themselves, meaning not able to find alternative housing for the time period of the work being done to the home.
